

## **A cheaper, faster way to send money abroad.**

### **Three things we believe about sending money.**

It should be low-cost and fair.

There's only one fair exchange rate, and that's the one you get on Wise. And the fee for using Wise is always upfront. Why? Because finance hasn't been fair for a very long time, and it's time for a better, cheaper way of moving your money.

#### **It should be easy.**

Sending money should be stress-free - no matter how far it's traveling. So we've built a whole team that's dedicated to keeping your money safe and the process watertight. It's bank-level security, minus the banks.

#### **It should be fast.**

We believe that sending money should be as fast as sending an email. So we've made Wise as simple as logging on, signing up, and sending. Smart technology means money never crosses borders. And most transfers happen the same day.

## **The Wise story**

Wise was launched in 2011 with the vision of making international money transfers cheap, fair, and simple.
