

At **OnYourMark, LLC** we view ourselves as a marketing company with an internet focus. Our marketing expertise covers a wide variety of industries with concentrations in manufacturing, healthcare, specialty retail and real estate.

We specialize in marketing and we have a team of top-notch developers who can design, produce, program, and host your website.

We compete on value, not price. The most cost-effective solutions are usually not the cheapest or the most expensive options.

Our web hosting services include an hour each month of our time, devoted to whatever we believe to be in the best interest of the great majority of our clients. This time is usually devoted to site promotion and marketing, though site maintenance and technical support are also given.

We are able to leverage our R&D to deliver a great deal of value in a relatively short time to each of our clients.

Services

Website Development Plan

Services are comprehensive. Web design, production, programming, hosting, internet marketing, overall marketing, social media and more
