

Colocation

We provide colocation services to customers looking for enterprise level network connectivity and support.

We contract with tw telecom for WAN connectivity; their fully redundant, self-healing, dual-ring OC-192 SONET carrier backbone utilizes three diverse routes to Milwaukee, Chicago, and Minneapolis ensure that any single failure will not cause a network outage.

- Dedicated 480V, 800 amp transformer from Wisconsin Energies
- Power sustainability is ensured by a battery backup UPS system and a 500 Kva diesel generator
- All AC commercial power is protected via a Transient Voltage Surge Suppression (TVSS) system
- The climate inside the facility is maintained through three redundant HVAC units with a 120 ton total cooling capacity
- Restricted and monitored access to the colocation facility
- Video camera surveillance

Need colocation facilities in the Milwaukee area? Whether you have one system, a shelf or a rack, we can cost-effectively provide colocation for your equipment or help you set up servers.
