

# Server Management

For clients that would like to collocate with OnYourMark but are not looking to run their own IT department to run their servers, OnYourMark can help. With our training in Windows, Mac OS X, Linux, and BSD operating systems, as well as our technical experience, training, and certification on a wide range of Dell, HP, EMC, Juniper, and Cisco equipment we are able to fully manage your network infrastructure. Allow us to give you the freedom to pursue your companies goals without having to deal with the hassle and cost of running your own IT department.
