

# Website Analytics

We say that “getting information from the Internet is like taking a sip of water from a fire hose.” We collect a lot of that information automatically, and make it accessible to you 24/7 via a password-protected part of your site we call a ‘Gateway’. Our website traffic logs show you how many visitors your website has received, what they viewed, how they find you and where they came from!

We also offer installation of Google Analytics for additional information on your website. Google Analytics also coordinates with Google AdWords and Google AdSense.
